Empowering Global Partnerships

ABOUT US

It all started in **2004** with an idea...

Global Synergix is a sourcing and procurement service provider dedicated to delivering substantial and sustainable value through the acquisition of goods and services from both emerging and developed markets. Since our founding in 2004 and headquartered in Atlanta, we have expanded our presence with a strategic partner in Bangalore, India, allowing us to closely integrate with both our customers and India's capable supplier network.

Our approach involves identifying and evaluating sources in India to meet rigorous technical, process, and quality standards. We go a step further by assigning our own engineers to oversee manufacturing processes on-site, ensuring stringent quality control. With a dedicated strategic sourcing professional, you will receive tailored service designed to foster growth for your company. Our comprehensive quality assurance program includes feasibility analysis, inspection guidelines, procedures, methods, and production reports, all aimed at exceeding customer expectations.

GS TEAM

What Do We Do?

Custom international sourcing & procurement

Large-scale purchasing & manufacturing support

Advanced engineering services

Expertise in diverse markets, especially India & Southeast Asia

Specialized in modular assembly projects

Advantages

- Reduce the cost of goods sourced and decrease overhead costs
- Let you focus on your core competencies for facilitating greater market share
- Supply base reduction leading to reduction in complexity
- Increase the efficiencies by reducing the cycle time from order placement to order execution
- Global Synergix is a one stop shop for all your sourcing needs
- With us, your sourcing and manufacturing needs are in good hands. We will add value by working together with you.

WHY GS

You have options when deciding where and how you will have your custom component parts manufactured. As a top-rated global sourcing company, GS may be your best option, based upon your specific needs. You may choose to contract manufacturing directly with an overseas factory, handling all of the manufacturing management, communications, quality inspections, customs, logistics, and shipping yourself. Or, you may choose to work with buying agent or third-party manufacturing management service provider.

GS is uniquely positioned to provide you with the lowest sustainable price, guaranteed highest quality, on-time delivery, and consistent reliability. Our services are scalable, allowing to use all of our services, just product sourcing, or any combination of services that you need most.

- Value Pricing
- Experience and Expertise
- Scalable Services
- Teams in the U.S.
- Project Insight
- Key Account Manager-project management
- Integrated supplier development to ensure Quality
- Engineering and interpretation
- Our technical team create 2D & 3D drawings and convert 2D drawings to 3D drawings.
- Complete ownership
- End- to end supplier chain
- Hassle-free Delivery

What's the Benefit to You?

Unmatched service for efficient & cost-effective solutions.

Long-term relationships based on trust & growth.

Stay ahead with market insights and strategic sourcing.

Tailored solutions for your business's global market success.

Project Management Services

At Global Synergix, we turn your project ideas into reality. Our Project Management services ensure projects are completed on time, within scope, and within budget. With our team of certified professionals, we offer customized solutions tailored to your needs.

Project Planning

We provide detailed project planning to define scope, goals, and deliverables, ensuring every step is meticulously planned for success.

Resource Management

Our resource management services include efficient allocation and management of resources to optimize project performance.

Risk Management

We identify and mitigate potential risks to ensure your project stays on track, utilizing comprehensive risk assessment strategies.

Quality Assurance

Our continuous monitoring and evaluation processes maintain high-quality standards throughout the project lifecycle.

Reporting and Communication

We offer transparent reporting and regular updates, keeping you informed every step of the way.

Products & Services

We understand that different customers have different needs. Our services are scalable and flexible, so that we can provide you with the precise combination of global sourcing solutions that you need the most. Customers may choose to merely source their custom component parts through Global Synergix, taking advantage of our value pricing from established companies. Other customers, for example, may want to add on-site inspections, shipping & logistics, financing, and domestic warehousing services. At Global Synergix, you may select a service or combination of services that provide you with the most precise value.

Thermoforming

Thermoforming is a versatile plastic manufacturing process where plastic sheets are heated to a pliable forming temperature and then molded into desired shapes using various techniques. It is ideal for producing both simple and complex shapes with high precision and efficiency.

Applications

- **Consumer Goods:** Custom packaging, trays, and containers.
- **Automotive Parts:** Interior panels, dashboards, and trim components.
- **Medical Devices:** Custom trays and housings for medical equipment.
- **Industrial Uses:** Covers and enclosures for machinery.

Floor Mats

High-quality floor mats designed for durability, comfort, and protection. Ideal for various applications including automotive, residential, and commercial settings

Applications

- **Automotive:** Custom-fit mats for cars, trucks, and SUVs
- **Residential:** Mats for home use, including entryways and kitchen areas.
- **Commercial:** Heavy-duty mats for workplaces and public areas

Empowering Global Partnerships

Fabrication

Custom metal fabrication services including cutting, welding, bending, and assembling metal structures and components to meet specific needs and specifications.

Applications

- **Construction:** Structural components, frames, and supports
- **Industrial:** Custom machinery parts and enclosures.
- **Consumer Goods:** Custom metal products and decorative items.

Hydraulic Commodity

A range of hydraulic components and systems designed for various applications, providing reliable performance and efficiency in fluid power systems.

Applications

- **Agricultural Equipment:** Hydraulic cylinders, valves, and pumps for tractors and harvesters
- **Industrial Machinery:** Components for presses, lifts, and conveyors.
- **Construction Equipment:** Hydraulic systems for excavators, loaders, and cranes.

Shocks and Suspensions

Advanced shock absorbers and suspension systems designed to enhance vehicle handling, safety, and comfort.

Applications

- **Automotive:** Replacement and performance-enhancing shocks and suspensions for cars and trucks.
- **Off-Road Vehicles:** Heavy-duty suspensions for improved off-road capability.
- **Motorcycles:** High-performance shock absorbers for better ride quality and control.

Modular Assembly

Pre-assembled modular components designed for easy integration and assembly into larger systems or structures. Includes rear and front axles, and other critical components.

Applications

- **Automotive:** Modular axles and drivetrain components for various vehicle types.
- **Construction:** Prefabricated modules for quick assembly and installation.
- **Industrial:** Modular systems for machinery and equipment.

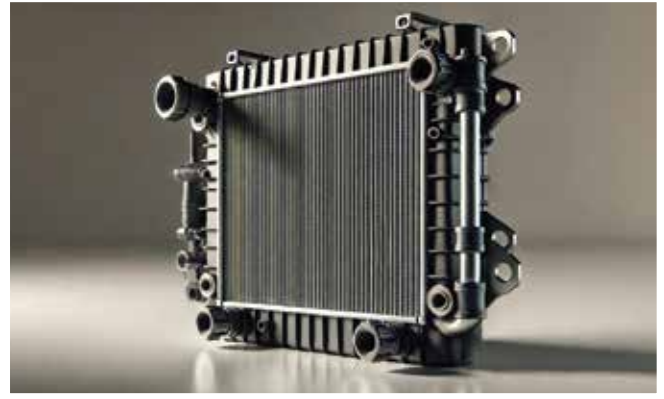

EV Traction Motors

High-performance traction motors designed for electric vehicles (EVs), providing efficient power conversion and reliable performance.

Applications

- **Electric Cars:** Motors for various types of electric vehicles.
- **Electric Bicycles and Scooters:** Compact and efficient motors for lightweight EVs.
- **Commercial EVs:** Motors for electric vans, trucks, and buses.

Radiators

Radiators designed for efficient cooling and heat dissipation in various applications, ensuring optimal performance and longevity of engines and systems.

Applications

- **Automotive:** Cooling systems for cars, trucks, and motorcycles.
- **Industrial:** Radiators for machinery and equipment.
- **Marine:** Cooling solutions for marine engines and systems.

Casting

Precision casting services for creating complex metal parts and components through various casting techniques, including sand, investment, and die casting.

Applications

- **Automotive:** Engine components, transmission parts, and chassis elements.
- **Aerospace:** High-strength components for aircraft and spacecraft.
- **Industrial:** Parts for machinery, tools, and equipment.
